Welcome to Breckland Garden Buildings

Breckland Garden Buildings Ltd opened in 2018 and has been providing products and services ever since.

No matter how unique or challenging your request is, you can count on us to help you get the building you envisage.

Based in East Harling, Norfolk, we have a strong team with over 50 years experience in the industry.

What really sets us apart from the rest is our ability to customise our buildings to meet customers' needs, as well as our fantastic team of installers, manufacturing team, and our award-winning sales agents, Bourne Buildings in Farnham, Surrey.

With thousands of satisfied customers and a continually expanding range of high-quality garden buildings, Breckland Garden Buildings is proud to be a trusted choice for outdoor spaces. Our collection offers something to suit every style and need, and if our brochure doesn't include the perfect fit, we're happy to create a bespoke design tailored to your requirements.

Breckland Garden Buildings utilise the highest quality timber sourced from sustainably managed forests. We also strive to source many of our other materials from UK manufacturers and suppliers, such as our felt, slate-effect tiles & breathable membrane (moisture barrier), which are produced and supplied to us by a leading UK manufacturer & supplier.

We recommend visiting our sales agent, Bourne Buildings, based in Farnham, Surrey, to appreciate the quality of our buildings. However, if you are unable to visit the show site, we have many beautiful examples of our buildings featured in our brochures and on our website.

All our photos feature show models at Bourne Buildings or buildings installed in our lovely customers' gardens.

From the purchase and construction to the delivery and installation, all of which is carried out by our own staff, we will make the process as convenient as possible, with aftercare dealt with as a priority.

Our garden buildings come with a 12-month guarantee against faulty parts and workmanship and 10 years against wood rot and fungal disease when treated & maintained in line with our recommendations.

Pent roof garden room with sliding door & full-length windows in UPVC or aluminium, vertical thermowood cladding, EPDM rubber roof, black aluminium trim pack with 6" recessed porch & composite decking

STANDARD SPECIFICATION

CLADDING

Thermowood – Redwood Scandinavian tongue & groove vertical cladding 19mm x 125mm (16mm finish), 44mm x 125mm framework to walls & solvent treatment to cladding

Apex roof garden room with full length door(s) & windows in UPVC or aluminium

STANDARD SPECIFICATION

CLADDING

Thermowood – Redwood Scandinavian tongue & groove horizontal cladding 19mm x 125mm (16mm finish), 38mm x 68mm framework to walls, solvent treatment to cladding and roof

FLOOR

18mm moisture resistant chipboard & 44mm x 44mm pressure treated Redwood floor joists

ROOF

12mm tongue & groove matchboard with 38mm x 63mm roof joists, timber fascia & heavy-duty bitumen felt

DOORS & WINDOWS

Full length double French doors or Single door with 150mm door cill, fixed windows to front & 2 Small (S) up to 600mm wide or Medium (M) 601mm - 850mm wide top vented or opening windows (one on each side)

Standard windows are full length. These can be changed to 3/4 length or 1/2 length at no additional cost (excluding double & triple casement windows)

Double glazed units 4mm – 20mm – 4mm clear argon filled, toughened glass

ADDITIONAL OPTIONAL EXTRAS (See page 42)

- Vertical cladding
- Painted external finish
- MDF lining – painted white as standard internal V grooved long grain (vertical) MDF lining to walls & roof with moisture barrier & 25mm cavity board insulation to walls, roof & floor
- 50mm cavity board insulation upgrade to walls & roof (floor can only be 25mm insulation, see pg. 49)
- Partition
- Integral open sided area
- Extra board of height
- Additional UPVC doors & windows
- Aluminium doors & windows
- Shed/Summerhouse doors & windows
- No floor
- Bolt down
- Bolt to existing building
- Guttering & Downpipes
- Workbenches & Shelves
- EPDM rubber roof
- Slate effect tile roof
- Cedar Shingle roof
- Solid internal white door for internal partitions
- Composite decking
- Laminate flooring
- 1st fix customer cable fitting

EPDM roofing membrane

One-piece synthetic rubber with little or no maintenance with a life expectancy of up to 50 years, suitable for Apex and Pent roofs.
(Pent roofs have UPVC fascia trims and corners, Apex roofs have timber fascias)

Slate effect tile roof

A composite roof tile made from mineral reinforced 99% recycled and re-engineered materials. Its unique structure makes it lightweight, gives it superior strength, and requires little to no maintenance. Suitable for Apex roofs only

Cedar Shingle roof

Western Cedar Shingle is a renewable and sustainable roofing material that is light weight yet durable and provides a high degree of thermal insulation. Suitable for Apex roofs only

13' x 8' Apex Garden Room

UPVC doors & windows anthracite grey, horizontal Thermowood cladding, full-length French double doors, 2 rear privacy windows 915mm x 450mm, black fixings, MDF (V grooved) painted lining (white) with moisture barrier & 25mm board insulation, painted finish in linen, slate effect tile roof, laminate floor farmhouse white, 8' unpainted partition wall with additional shed door, black guttering & downpipe

OXFORD APEX PRICE LIST

19

Includes full length double French doors or single door, full length fixed windows to front & 2 full length small or medium top vented windows (one in each side)

Corner pent roof garden room

(Cheltenham) with full length doors & windows, or (Dorchester) 3/4 or 1/2 length doors with 1/2 length casement windows in UPVC or aluminium

STANDARD SPECIFICATION

CLADDING - Thermowood – Redwood Scandinavian tongue & groove horizontal cladding 19mm x 125mm (16mm finish), 38mm x 68mm framework to walls & solvent treatment to cladding

FLOOR - 18mm moisture resistant chipboard & 44mm x 44mm pressure treated Redwood floor joists

ROOF - 18mm structural grade OSB boards with 44mm x 95mm – 44mm x 146mm roof joists, depending on building size, EPDM rubber roof with UPVC black trim to sides & black gutter trim to rear (100mm deep), black gutter & downpipe to rear

ROOF OVERHANG - 12" to front, rear is flush to cladding

CHELTENHAM DOORS & WINDOWS - Full length double French doors or single door with 150mm door cill, 2 top vented or opening windows to front

Standard windows are full length. These can be changed to 3/4 length or 1/2 length at no additional cost (excluding double & triple casement windows)

Double glazed units 4mm – 20mm – 4mm clear argon filled, toughened glass

DORCHESTER DOORS & WINDOWS – 3/4 or 1/2 length double French doors or single door with 150mm door cill & 2 1/2 length casement windows to front

Standard windows are 1/2 length casement. These can be changed to 3/4 length windows at no additional cost

Double glazed units 4mm – 20mm – 4mm clear argon filled, toughened glass

OPTIONAL EXTRAS (further information on page 42)

- Vertical cladding
- Painted external finish
- MDF lining – painted white as standard internal V grooved long grain (vertical) MDF lining to walls & roof with moisture barrier & 25mm cavity board insulation to walls, roof & floor
- 50mm cavity board insulation upgrade to walls & roof (floor can only be 25mm insulation, see pg 49)
- Partition
- Extra board of height
- Additional UPVC doors & windows
- Aluminium doors & windows
- Side hung windows (available on some sizes)
- Shed/Summerhouse doors & windows
- No floor
- Bolt down
- Bolt to existing building
- Guttering & Downpipes
- Workbenches & Shelves
- Solid internal white door for internal partitions
- Laminate flooring
- 1st fix customer cable fitting
- External spotlight package (10 lights, white or blue)

8' x 8' Cheltenham Corner Pent Garden Room

Aluminium doors & windows, full length French double doors, 2 top vented full-length windows, 800mm x 1857mm, anthracite grey, black fixings, Thermowood horizontal cladding, 12" overhang to front, MDF (V grooved) painted lining (white) with moisture barrier & 25mm board insulation, painted finish tranquil blue, EPDM rubber roof, laminate floor dark grey oak, black guttering & downpipe

Moisture barrier – IKO Rubbershield

Prevents warm air or water vapor from reaching its dew point, which can lead to condensation and dampness. They help to protect the building fabric from moisture infiltration from the outside environment and increase thermal performance.

- BBA Approved, highly breathable, allows escape of harmful moisture vapor, robust and hardwearing

Celotex PIR or equivalent board insulation

A multi-purpose insulation board, with high-performing energy efficiency and thermal conductivity. PIR is a polyisocyanurate insulation board with excellent thermal performance, featuring a low emissivity foil facing

Painted V grooved long grain (portrait) MDF Lining

Building is lined internally with V grooved long grain MDF (9mm) for an exceptional look, with moisture barrier & Celotex or equivalent board insulation underneath

Extra board of height (approx 3.5" per board)		Add 5% to basic price & paint options
Guttering & downpipe (black)		£12 per running ft
Attach to existing building		No cost option (in lieu of missing panel)
Non-standard shape building surcharge (pent only)		Add 20% to basic price
No Floor		Less 5%
Bolt down to base (specify with or without lip)		£6 per running ft
Reverse Apex		Add 10% to basic price
Roof overhang (add additional roofing cost to any roofing upgrade option per sq ft)		£15 per sq ft
Painted finish		£54 per running ft of wall
Painted finish non-standard paint colour match		Add 10% to basic paint cost
MDF lining paint colour other than white		Add 10% to basic cost
Laminate floor		£9.60 per sq ft of floor
Laminate floor surcharge for upgrade option		£1.40 per sq ft to basic laminate cost
Black aluminium powder coated trim pack (includes 2 front vertical corner covers)		£40 per running ft (4 sides of roof)
6" recessed porch with composite decking (length x 0.6ft)		£75 per sq ft
6" recessed porch (length x 0.6ft)		£35 per sq ft
Composite decking for 6" recessed porch (length x 0.6ft)		£46 per sq ft
Composite decking (open area only)		£22.5 per sq ft of floor
Fit customer cables service (customer to provide cables)		£300
Return to complete install following cable fitting by customer		£700
Lighting package (10 lights) choice of white or blue		£300
EPDM rubber roof covering (Apex) - with timber facias		£8 per sq ft of roof
EPDM rubber roof covering (Pent) - with UPVC roof trims		£10 per sq ft of roof
Internal white solid door (for internal partitions)		£300
Cedar shingle roof (Apex only)		£24 per sq ft of roof
Slate effect tile roof (Apex only)		£24 per sq ft of roof
Shed doors & windows		
Shed double solid door (Thermowood), includes 3 lever mortice lock with heritage range handle & internal hinges, with fixing colour choice: black, satin, chrome or brass		£489
Shed single solid door (Thermowood), includes 3 lever mortice lock with heritage range handle & internal hinges, with fixing colour choice: black, satin, chrome or brass		£294
Shed fixed window		£40
Shed opening window		£90
Double glazed glass per window		£60
SHELVES & WORKBENCHES		
12" PAINTED SHELF	16" PAINTED WORKBENCH	24" PAINTED WORKBENCH
£26 PER RUNNING FT	£32 PER RUNNING FT	£39 PER RUNNING FT

VIEW OUTSIDE

VIEW INSIDE

**Aluminium doors have a minimal external profile**

Our hinged window system with thermal break and a slim sideline, allows a great brightness inside the room. With a modern aesthetic of straight lines.

RESISTANCE TO ATMOSPHERIC AGENTS

Our systems are tested in the Test Laboratory at our suppliers Technological Center to guarantee the best performance in watertightness, air permeability, and wind loads, endorsed by the maximum results in its test qualifications.

THERMAL INSULATION

Nowadays, energy efficiency in buildings is a demand made both by companies and the final customer being aware of the importance of energy efficiency. Our Aluminium products have an excellent energy efficiency: window transmittance from 1,0 (W/m²K)*(depending on building specifications).

ACOUSTIC INSULATION

Our enclosed systems are developed with the latest technology to provide noise protection: up to 45dB acoustic reduction.

DURABILITY

Aluminium is the most durable, long-standing and resistant material of those used in enclosures.

SUSTAINABILITY

Respect for the environment by using innocuous raw materials and products in the manufacturing process, and the limitless possibility of aluminium recycling.

Removes the creation of waste and environmental risk.

**Aluminium door handle colours**

- Sleek, modern design: Enhance the aesthetics of any space with slim frames and expansive glass panels.
- Smooth Operation: Advanced lift and slide mechanism ensures easy and quiet operation.
- Exceptional thermal efficiency: Keeps interiors warm in winter and cool in summer, contributing to energy savings.
- High security: Built with robust materials and advanced locking systems for maximum protection.
- Durable and low maintenance: Aluminium is resistant to corrosion, warping, and requires minimal upkeep.
- Versatile configurations: Available in sliding, bi-folding, and custom configurations to suit different spaces.
- Maximises natural light: Large glass panels allow for more daylight to enter the space, creating a bright and airy environment.
- Weather-resistant: Designed to withstand harsh weather conditions without compromising on performance.

PAINTED MDF V GROOVED LINING WITH MOISTURE BARRIER & CAVITY BOARD INSULATION

Building is internally lined with V grooved (long grain portrait) MDF lining (painted white as standard) to walls & roof with moisture barrier & 25mm Celotex cavity board insulation (or equivalent standard) to walls, roof & floor (moisture barrier is beneath floor & insulation between floor joists). MDF lining comes with skirting & architrave.

COLOUR PAINTED FINISH

Our comprehensive painting process includes a primer undercoat that contains anti knot bleed formula with 2 topcoats of your paint colour choice, providing a professional finish. Our paint finishes provide protection against harsh environments & wood rot.

MOISTURE BARRIER

You can also add a breathable membrane, which is a moisture barrier, minimising the risk of condensation. This is ideal if you are wanting to board the inside of your building yourself following installation.

SOUNDPROOFING (ACOUSTIC) MEMBRANE

A high-density, polymer-based, soundproofing membrane provides good acoustic insulation and excellent sound proofing properties. Sound damping is a problem with many constructions and with rigid sheet materials, as they absorb little sound energy because they easily vibrate and radiate sound through a structure. Acoustic membrane is used in combination with sheet materials to add mass and density to wall, floor and ceiling structures. The product is developed and manufactured in the UK.

MLV50 - Thickness: 2.6mm, weight: 5kg per sqm, acoustic performance: 26dB.

MLV100 - Thickness: 5mm, weight: 10kg per sqm, acoustic performance: 31dB.

FELTED ROOF

Heavy duty (30kg) green mineral felt is standard on Apex roofs (UK manufacturer & supplier).

EPDM RUBBER ROOF

This is a synthetic rubber with little to no maintenance, with a life expectancy of 50 years, suitable for Apex & Pent roofs.

SLATE EFFECT TILE ROOF

A composite roof tile made from 99% recycled & re-engineered materials. Its unique structure makes it light weight yet durable, and provides a high degree of thermal insulation, suitable for Apex roofs only.

CEDAR SHINGLE ROOF

Western Cedar shingle is a roofing material that resembles roofing tiles. They are light weight yet durable, providing a high degree of thermal insulation, suitable for Apex roofs only.

GUTTERING & DOWNPIPE

Black half round gutter (112mm) with Black round downpipe (68mm) & fixings.

VERANDA & ROOF OVERHANGS

If you would like to add an integral veranda or roof overhang to your building, please see our price lists for further details.

LAMINATE FLOORING

Our high-quality laminate flooring is a great addition available in many of our product ranges, with many styles to choose from, which includes chipboard floor upgrade.

BLACK ALUMINIUM TRIM PACK WITH 6" RECESSED PORCH & COMPOSITE DECKING

Black powder coated aluminium trim (replaces UPVC roof trims), includes 2 front vertical corner covers and covers to the front, sides & rear of the roof with 6" recessed porch and composite decking, with a 6" recessed porch and composite decking (available on Pent buildings only)

COMPOSITE DECKING

Our decking boards are manufactured using a combination of recycled plastic, recycled natural wood fibres, and a small number of additives to boost anti-UV and anti-ageing properties. Our decking boards are a unique 3D embossed woodgrain or deep grooved channel finish to choose from, so they are fully reversible.

FLOOR BEARERS

Our floor bearers are 3 ¾" x 3" (95mm x 76mm) pressure treated lengths of timber. Our buildings are designed to sit directly onto exact size bases, which allows air flow underneath. Floor bearers raise a building off the ground to prevent the floor from getting damp and rotting. Bearers need to be laid on flat, level, compact ground (or on top of level paving slabs/concrete). We advise bearers to be used if the base is larger than the footprint of the building, or if there is restricted airflow around the building (i.e., a fence or wall very close to the shed) to avoid rainwater building up and sitting against the floor of the building. Bearers run in the opposite direction to the floor joists within the floor of your building, making a crisscross section. Floor bearers will add 3" to the height of the building.

FIT CUSTOMER CABLES (1ST FIX) - CABLES TO BE PROVIDED BY CUSTOMER

We provide this service to allow lighting and socket cables to be run internally within the wall cavity in the correct place for the MDF to be fitted over. Each sheet of MDF is measured and holes drilled before the sheet is installed to allow the cables to come through in the correct place. This is to allow space between each running upright for the socket boxes to fit into the cavity space, which involves carpentry work with notching out studs to allow the cables not to interfere with the MDF lining. If you have an electrician who wishes to carry out this work, they must do a diagram of where the wires are so they can drill through the wall to pull the cables through after we have installed the MDF lining.

TIMBER

Our Garden room/offices are manufactured using Scandinavian Redwood pine throughout, which has been through a heat treatment process, which gives it its name Thermowood.

Thermowood, also known as heat treated timber, is a beautiful, sustainable timber material produced using chemical-free heat treatment. The intensive heat the wood is exposed to during its production dries it out deep into the core, causing all moisture and resin to be removed from the timber.

Thermowood therefore doesn't react to changes in humidity as drastically as untreated wood (the risk of swelling, cracking, and shrinkage is decreased), allowing it to retain its shape far better. The wood also doesn't secrete sap or resin even in high temperatures and its average life span is prolonged.

BASE & ACCESS

- We require the base for the building to be flat, compact, level (to a spirit level standard), and either concrete, paving, or decking. If you require the building to be installed on earth or grass, you will require bearers, and the area must be flat, level (to a spirit level standard) & compact.
- The base should be the same size as the building itself, level (with no drainage slope), and be at least 2 inches above ground level to avoid surface water running underneath (i.e., a 10 x 8 building requires a 10 x 8 base). Bases can be larger than the building (bearers recommended), but not smaller. If you are unsure about what type of base will be suitable, please contact us and we will advise you in more detail.

If a base is not suitable for the building to be installed on the day(s) allocated for the installation as per our terms and recommendations, the customer will be responsible for storing the building, and a return installation fee will be charged.

WORKING AREA

- We require a working area of at least 18 inches (0.5m) around the base and 12 inches between the base and other structures. If you have less than this available, please advise when placing your order, and be careful to make allowances for any roof overhangs.
- Please make sure there are no overhanging branches or foliage through the access point or over the base, as our team cannot remove these. Please allow for any roof overhang on the building if it is to be located near a fence, garage, or any other structure.
- Our installers will need suitable parking within 25m of your entrance, which must be available on the day for our vehicles. If there are any vehicle access problems, please notify us in advance of your delivery and installation date. Please be aware that we cannot block roads, neighbours' driveways, park on roads with fast-moving traffic, or on bends with limited visibility.
- We do require the distance from the unloading area to the base to be 100m or less. If you feel the carry will exceed this, please discuss with us, as this may extend the installation time.
- If parking permits are required, these are to be arranged and paid for by the customer before our arrival or upon arrival for the duration of the booking date. If parking is paid on the day, this is to be arranged and paid for by the customer for the duration of the booking date.

KEY INFORMATION TO NOTE

- Our team will need suitable parking within 25m of your entrance, which must be available on your booking date. If there are any vehicle access issues that you are aware of or difficulties in finding your property, please notify us in advance of your booking date.
- Please allow clear, uncluttered access so we can carry your building panels safely. Our team cannot work at heights over 10m, lift panels over 4ft high, or work in unsafe conditions. Please inform us if there are any height, width, or sharp turn restrictions, and provide us with the height and width measurements of the restrictions. Failure to do this may result in Breckland not being able to deliver the building or install it.
- Door toggles must be used to support doors when closed at all times to prevent the doors from warping.

We are happy to accommodate difficult access; however, we do need to know in advance, so we are able to make arrangements accordingly and schedule the correct number of staff for the booking day.

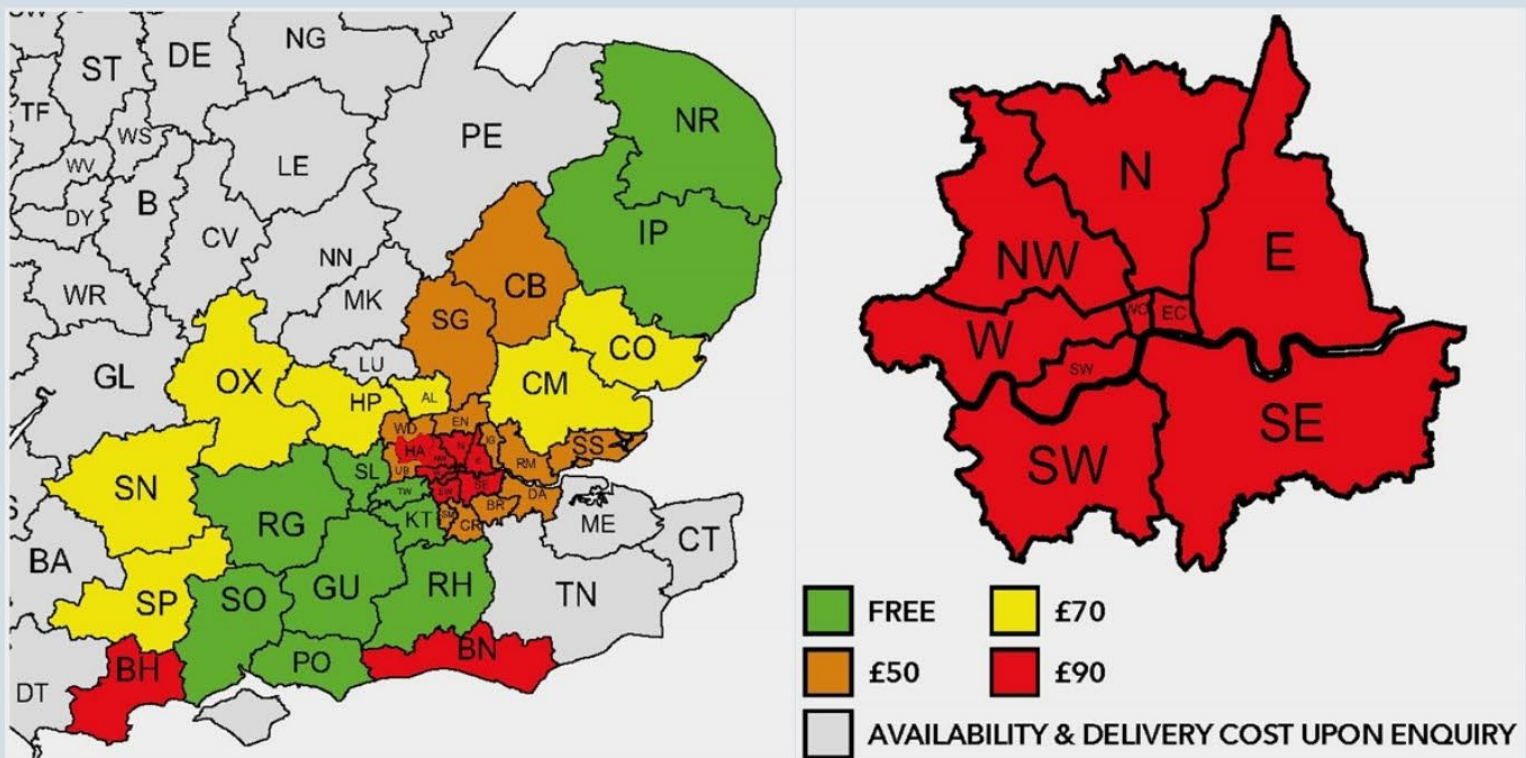

As it is our policy to continually improve our products, we reserve the right to change specifications from time to time; however, we will not change any significant variations without the customer's agreement.

We provide a 12-month guarantee against faulty parts and workmanship, and 10 years against wood rot and fungal disease; when buildings are treated and maintained in line with our recommendations.

We recommend that all buildings are cleared regularly of any build-up of debris sitting against the outside walls, such as wet leaves, that will cause prolonged exposure to moisture. We recommend that all Thermowood buildings are given a coat of solvent based treatment as soon as possible after installation (if not already included in order) to prevent moisture ingress, followed by a further application at least every 6-8 years. All painted buildings should be inspected on an annual basis for any areas where paint has started to deteriorate over time, peeling or flaking, and repaint where necessary. A full repaint is recommended every 6 – 8 years.
