## Welcome to Breckland Garden Buildings

Breckland Garden Buildings Ltd opened in 2018 and has been providing great products and services ever since. No matter how unique or challenging your request is, you can count on us to help you get the building you envisage.

Based in East Harling, Norfolk, we have a strong team with over 50 year's experience in the industry.

What really sets us apart from the rest is our ability to customise our buildings to meet customers' needs, as well as our fantastic team of installers, manufacturing team and our award-winning sales agents, Bourne Buildings in Farnham.

Thousands of customers have already used Breckland Garden Buildings for their garden building needs, and with an impressive selection that's constantly growing, we guarantee you'll find exactly what you need. Whether it's a traditional garden Shed, a modern style Summerhouse, or Studio/Office, here at Breckland Garden Buildings, you'll find just what you're after, and if what we have shown in our brochure doesn't quite fit your requirements, we can design a building bespoke to your needs.

Breckland Garden Buildings use the highest quality timber sourced from sustainable forests. We also strive to source many of our other materials from UK manufacturers and suppliers such as our felt, slate effect tiles & breathable membrane (moisture barrier) that are produced and supplied to us by a leading UK manufacturer & supplier.

It is recommended to visit our sales agent Bourne Buildings based in Farnham, Surrey so you can appreciate the quality of our buildings, however if you are unable to visit the showsite, we do have many beautiful examples of our buildings in our brochures and our website.

All our photos are of our Showmodels at Bourne Buildings, or of buildings installed in our lovely customers gardens.

From the purchase and construction to the delivery and installation, all of which is carried out by our own staff, we will make the process as convenient as possible with aftercare dealt with as a priority.

# CAMBERLEY SHED - APEX/PENT

14' x 10' Camberley Apex - EPDM rubber roof, 5ft double doors, 3 x opening windows & 2 x fixed windows, solvent treatment, tanalised timber, heavy duty cladding & toughened glass

- **Double door measurements door board size** - (5ft - 61 1/2" x 77 3/8"), (6ft - 73" x 77 3/8"), (7ft - 85 1/2" x 77 3/8") & (8ft - 96" x 77 3/8")
- **Single door measurements opening size** - 33 1/2" x 74"
- **Single door measurements door board size** - 35" x 77 3/8"
- **Windows** - fixed 2' X 2' windows to one side with horticultural glass
- **Ironmongery** - black as standard
- Choice of door and window positioning

## OPTIONAL EXTRAS

- Heavy duty cladding upgrade (19mm nominal, 15mm finished size)
- Barretine solvent wood protective treatment (Cladding both sides, roof & floor)
- Tanalised pressure treated throughout
- Non - standard shape (Pent)
- No floor option - base to be made 1" under in total (e.g 10 x 8 = 9'11 1/2" x 7'11 1/2")
- Extra board of height
- Double door 5ft (various sizes available) in lieu of single door
- Additional double/single doors
- Security door upgrade with hidden hurl hinges , 3 lever mortice lock & lever handle, (not available on doors over 5ft wide)
- Stable door
- Taller/wider door
- Coach bolt hinges to standard door (for added security)
- Hook & Band hinges to standard door
- Additional fixed & opening windows
- Opening window
- Security windows
- Toughened glass
- Double glazed windows
- Summerhouse doors (additional boards of height may be required)
- Summerhouse windows
- Reverse Apex
- Rustic roof, tanalised & solvent treated
- EPDM rubber roof (Apex & Pent)
- Cedar shingle roof (Apex only)
- Slate effect tiled roof (Apex only)
- Guttering & downpipe
- Partition (Tongue & Groove)
- Painted finish
- Roof overhang
- Integral veranda
- Unpainted plywood lining & Celotex insulation
- Breathable membrane
- MDF (V grooved) painted lining (white) with breathable membrane (moisture barrier) & Celotex insulation
- Vertical cladding with Thermowood cladding upgrade
- Workbenches & shelves
- Air vent
- Composite decking
- Laminate flooring
- Chipboard floor upgrade

14'0"	7'0" (2.13m)	8'2 1/2" (2.5m)
16'0"	7'0" (2.13m)	8'2 1/2" (2.5m)

\*\*\* To be under 2.5m all sizes must have EPDM rubber roof

**Base Information**

We require the base for the building to be flat, level, square, compact, clear of debris and not sloped. If you are unsure on what type of base will be suitable, please speak to Bourne Buildings, or alternatively you can call or email us.

Please ensure there are no overhanging branches over the base, as during installation the team will need to fit the roof and roof covering, they will not be able to do this with overhanging branches, trees, or bushes. Please also ensure that your base has sufficient clearance from any trees or other structures to ensure the building can be installed, you also need to consider the style of your building ensuring there is nothing that will obstruct the roof overhang if your building has one.

For buildings 10' in length or over and 7' in width, the floor will be made in 2 or more sections.

If your base is made of concrete runs, bricks, wooden bearers or frames you will need to ensure you have supports where the floor sections will join. The bearers will also need to run in the opposite direction to the

floor joists within the floor of your building creating a crisscross formation (Floor joists always run the longest length as standard).

It is important to liaise with us if your base is one of the above or similar and provide a base layout when confirming your booking.

Buildings with lengths or widths 10ft or over the panels will be made in two or more sections. If you have any queries regarding the construction of your building or your base, please do not hesitate to contact us.

Floor joists run the longest length as standard. If you would like your floor joists to run the opposite direction, you will need to advise us in advance.

We understand there is a lot of information to consider, if you have any questions or need clarification on any of the information in our Brochures, please do not hesitate to contact us or Bourne Buildings.

## HERITAGE SUMMERHOUSE RANGE

# HERITAGE OCTAGONAL SUMMERHOUSE

8' X 8' Heritage Octagonal Summerhouse - Slate effect tile roof, painted finish olive grey, georgian 10 pane double doors & 8 pane windows (2 fixed windows to front & 2 twin side hung windows to sides), black fixings, MDF lining & insulation white, grey oak laminate flooring, solvent treatment to roof & floor, tanalised timber, heavy duty cladding & toughened glass

8' X 6' Heritage Octagonal Summerhouse - solvent treated rustic roof, painted finish spruce, painted MDF lining & insulation white, 3/4 glazed double doors & windows (2 fixed to front & 2 top hung windows to sides), double glazed upgrade, black fixings, fit customer cables, solvent to roof & floor, tanalised timber & heavy duty cladding

10' x 10' Heritage Octagonal Summerhouse - Cedar shingle roof, painted finish olive grey, painted MDF lining & insulation white, georgian 8 pane straight top double doors & windows (2 fixed windows to front & 2 twin side hung opening windows to sides), brass fixings, solvent treatment to roof & floor, bearers, fit customer cables, tanalised timber, heavy duty cladding & toughened glass

## STANDARD SPECIFICATION

- **Scandinavian redwood throughout**
- **Standard cladding** - 16mm x 125mm nominal (12mm finished size), Tongue & Groove Shiplap
- **Framework** - 2" x 2" (45mm X 45mm) throughout
- **Floor** - 16mm x 125mm nominal (12mm finished size), Tongue & Groove PTGV with pressure-treated floor joists
- **Roof** - 16mm x 125mm nominal (12mm finished size), Tongue & Groove PTGV, with green mineral felt
- **Doors & windows** - Glass to ground, 3/4 length & 1/2 length single glazed
- **6 x 6** - Single Summerhouse door, 2 fixed & 2 opening top hung windows (windows 537mm wide only to front & sides)
- **7 x 7** - Single or double Summerhouse door, 2 fixed & 2 opening top hung opening windows (windows 537mm wide only to front & 537mm or 745mm to sides)
- **8 x 6** - Double Summerhouse door, 2 fixed & 2 opening top hung windows (windows 537mm wide only to front & sides)
- **8 x 8** - Double Summerhouse door, 2 fixed & 2 twin top hung opening windows (537mm wide only to front)
- **9 x 9, 10 x 10 & 11 x 11** - Double Summerhouse door, 2 fixed & 2 twin top hung opening windows (windows 537mm or 745mm to front)
- **12 x 12** - Double Summerhouse door, 2 twin fixed plain single glazed windows to front & 2 tripple top hung opening windows with center fixed window to sides
- **Ironmongery** - black, chrome, or polished brass

## OPTIONAL EXTRAS

- Heavy duty cladding upgrade (19mm nominal, 15mm finished size)
- 3 x 2 framework upgrade
- Georgian Summerhouse doors & windows
- Toughened glass
- Double glazed door & window upgrade
- Side hung window upgrade
- Arch top door & window upgrade
- Additional fixed & opening windows
- No floor option - see Octagonal base plan (pg. 33)
- Extra board of height
- Barretine solvent wood protective treatment (cladding both sides, roof & floor)
- Tanalised pressure treated throughout
- Rustic roof, tanalised & solvent treated
- Cedar shingle roof
- Slate effect tiled roof
- Painted finish
- Unpainted plywood lining & Celotex insulation
- Breathable membrane
- MDF (V grooved) painted lining (white as standard) with breathable membrane (moisture barrier) & Celotex insulation
- Vertical cladding (Thermowood)
- Workbenches & shelves
- Bearers
- Air vent
- Composite decking
- Laminate flooring
- Chipboard floor upgrade

### Heritage Octagonal Summerhouse Options

#### SUMMERHOUSE DOOR OPTIONS

##### Plain Single Glazed Summerhouse doors (Glass to ground, 3/4 length or 1/2 length)

Additional summerhouse single door	£350	Toughened glass (per door)	£50
Additional summerhouse double doors	£640	Double glazed upgrade (per summerhouse door)	£90

#### GEORGIAN SINGLE GLAZED SUMMERHOUSE DOORS

##### Single door - choice of, 9, 12 or 15 pane or Double doors - choice of, 6, 8 or 10 pane

Additional summerhouse single door	£450	Toughened glass (per summerhouse door)	£50
Additional summerhouse double doors	£740	Double glazed upgrade (per summerhouse door)	£200

#### SUMMERHOUSE WINDOW OPTIONS

##### Plain single glazed Summerhouse windows (Glass to ground, 3/4 length or 1/2 length)

Additional fixed single summerhouse window	£230	Toughened glass (per summerhouse window)	£50
Additional opening single summerhouse window	£250	Double glazed upgrade (per summerhouse window)	£90
Summerhouse opening window in lieu	£75		

#### GEORGIAN SINGLE GLAZED SUMMERHOUSE WINDOWS

##### Choice of 3, 4, 6, 8, 9, 10 & 12 pane

Additional fixed single summerhouse window	£250	Toughened glass (per summerhouse window)	£50
Additional opening single summerhouse window	£270	Double glazed upgrade (per summerhouse window)	£200
Summerhouse opening window in lieu	£100		

#### GENERAL SUMMERHOUSE DOORS & WINDOW OPTIONS

Side hung window upgrade (per window)	£100	Arched top upgrade (whole building)	£150
---------------------------------------	------	-------------------------------------	------

#### ROOF

Extra board of height (approx. 3.5" per board)	Add 5% per board.	Cedar shingle roof (Octagonal)	£32 per sq ft of roof
Rustic roof tanalised & solvent treated (Octagonal)	£12 per sq ft of roof	Slate effect tiled roof (Octagonal)	£32 per sq ft of roof

ALL PRICES INCLUDE LOCAL DELIVERY & VAT

#### OTHER OPTIONS

No floor	Less 5%
Bolt down	£6 per running ft
Guttering & downpipe	£12 per running ft
Partition (T&G)	£35 per running ft
Painted finish	£54 per running ft
Summerhouse doors & windows inc frames different colour to buildings painted finish	£380.00
Paint colour match	Add 10% to basic paint cost
Tin of paint (approximately 1 litre) minimum order 5 litres	£38.50
Integral veranda	No cost option
Breathable membrane to walls (moisture barrier)	£8 per running ft of wall
Breathable membrane to roof or floor (moisture barrier)	£1.60 per sq ft
6mm Plywood lining & Celotex insulation to walls	£30 per running ft of wall
6mm Plywood lining & Celotex insulation to roof	£5 per sq ft of roof
9mm Plywood lining & Celotex insulation to floor	£6 per sq ft of floor
MDF painted lining (white) with breathable membrane (moisture barrier) & insulation	£63 per running ft of wall
MDF painted lining (white) with breathable membrane (moisture barrier) & insulation	£8.60 per sq ft of roof
Breathable membrane (moisture barrier) & insulation to floor	£5 per sq ft of floor
3 x 2 framework upgrade	Add 15% to basic price
Vertical cladding (Thermowood)	Add 20% to basic cost
Laminate floor	£9.60 per sq ft of floor
Air vent	£5 per vent
Fit customer cables on installation day	£300
Return to complete install following cable by customer	£500
Composite decking	£22.50 per sq ft
Chipboard floor upgrade	£2 per sq ft
*Shed door & window options please see pg. 7	

#### SHELVES & WORKBENCHES

LENGTH	8" SHELF	16" SHELF/WORKBENCH	24" WORKBENCH	36" WORKBENCH
UP TO 5'	£39	£66	£81	£94
6' - 8'	£53	£81	£94	£108

13'0"	3961mm	2886mm	1490mm
14'0"	4267mm	3190mm	1490mm

Bases for corner sheds should be made to these measurements

**Base Information**

We require the base for the building to be flat, level, square, compact, clear of debris and not sloped. If you are unsure on what type of base that will be suitable, please speak to Bourne Buildings, or alternatively you can call or email us.

Please ensure there are no overhanging branches over the base, as during installation the team will need to fit the roof and roof covering, they will not be able to do this with overhanging branches, trees, or bushes. Please also ensure that your base has sufficient clearance from any trees or other structures to ensure the building can be installed, you also need to consider the style of your building ensuring there is nothing that will obstruct the roof overhang if your building has one.

For buildings 10' in length or over and 7' in width, the floor will be made in 2 or more sections.

If your base is made of concrete runs, bricks, wooden bearers or frames you will need to ensure you have supports where the floor sections will join. The bearers will also need to run in the opposite direction to the floor joists within the floor of your building creating a crisscross formation (Floor joists always run the longest length as standard).

It is important to liaise with us if your base is one of the above or similar and provide a base layout when confirming your booking.

Buildings with lengths or widths 10ft or over the panels will be made in 2 or more sections.

Floor joists run the longest length as standard. If you would like your floor joists to run the opposite direction, you will need to advise us in advance.

We understand there is a lot of information to consider, if you have any questions or need clarification on any of the information in our Brochures, please do not hesitate to contact us or Bourne Buildings.

# HERITAGE SUMMERHOUSE - PLAIN DOOR & WINDOW RANGE

ALL DOORS & WINDOWS ARE AVAILABLE AS STRAIGHT TOP AS STANDARD OR ARCHED TOP AS AN OPTIONAL EXTRA (GLASS TO GROUND ARE ONLY AVAILABLE IN STRAIGHT TOP)

ALL SINGLE GLAZED DOORS & WINDOWS WILL COME WITH CHAMFER BEADING, ALL DOUBLE GLAZED DOORS & WINDOWS WILL COME WITH STEP BEADING - ALL MEASUREMENTS ARE COMPLETE SIZE INCLUDING FRAMES

# STANDARD PAINT COLOUR OPTIONS

These colours are for illustration purposes only, brochures and monitors will not show an exact representation of the colour as it would do on timber, therefore we advise that when selecting a final colour to visit our sales agent Bourne Buildings showsite, where we have paint colour sample boards.

Our comprehensive paint system includes a primer coat that contains protection against knot bleed, however due to the natural properties of timber we cannot guarantee knot bleed will not occur.

**White** RAL 9010

**Black** RAL 9005

**Thyme** BS 12 B 17

**Oregano** BS 10 B 21

**Olive (Moss Green)** BS 12 B 25

**Spruce** BS 12 B 21

## COMPOSITE DECKING OPTIONS

**Cedar Art**

**Charcoal**

**Coffee**

**Grey Art**

**Light Grey**

## OPTIONS, FURTHER IMPORTANT INFORMATION, TERMS & RECOMMENDATIONS

### COLOUR PAINTED FINISH (external)

Our comprehensive painting process includes a primer undercoat that contains anti knot bleed formula with 2 topcoats of your paint colour choice providing a professional finish. Our paint finishes provide protection against harsh environments & wood rot.

### PAINTED MDF V GROOVED LINING WITH BREATHABLE MEMBRANE & CELOTEX INSULATION

Building is internally lined with V grooved long grain MDF for an exceptional look, with breathable membrane (moisture barrier) & 25mm Celotex insulation.

### PLYWOOD LINING & INSULATION

9mm plywood lining to floor with breathable membrane (moisture barrier) & Celotex insulation, 6mm plywood lining with breathable membrane (moisture barrier) & Celotex insulation to walls & roof.

### BREATHABLE MEMBRANE (MOISTURE BARRIER)

You can also add a breathable membrane which is a moisture barrier minimising the risk of condensation, this is ideal if you are wanting to board the inside of your building yourself following installation.

### FELTED ROOF

Green mineral felt as standard on all ranges (UK manufacturer & supplier).

### EPDM RUBBER ROOF

This is a synthetic rubber with little to no maintenance with a life expectancy of 50 years, suitable for Apex, Pent and Barn roofs.

### SLATE EFFECT TILE ROOF

A composite roof tile made from 99% recycled & re-engineered materials. Its unique structure makes it light weight yet durable, and provides a high degree of thermal insulation, suitable for Apex & hipped roofs (UK manufacturer & supplier).

### CEDAR SHINGLE ROOF

Western Cedar shingle is a roofing material that resembles roofing tiles, they are light weight yet durable providing a high degree of thermal insulation, suitable for Apex & hipped roofs.

### RUSTIC ROOF

Our rustic roofs are made from pressure treated featheredge boards that are solvent treated, these roofs enhance the look of the building whilst adding protection to the roofing felt (sourced from a local saw mill in Norfolk).

### GUTTERING & DOWNPIPE

Black half round gutter (112mm) with Black round downpipe (68mm) & fixings.

### VERANDA & ROOF OVERHANGS

If you would like to add an integral veranda or roof overhang to your building, please see our price lists for further details.

### LAMINATE FLOORING

Our high-quality laminate flooring is a great addition available in many of our product ranges, with many styles to choose from.

### CHIPBOARD FLOORING (18mm moisture resistant boards)

If you are thinking of fitting your own flooring (i.e., laminate) we offer a chipboard flooring upgrade opposed to the standard PTGV flooring. PTGV flooring contains moisture which will transfer into anything laid onto it.

### COMPOSITE DECKING

Our decking boards are manufactured using a combination of recycled plastic, recycled natural wood fibres and a small number of additives to boost anti-UV and anti-ageing properties. Our decking boards are a unique 3D embossed woodgrain or deep grooved channel finish to choose from so are fully reversible.

### IRONMONGERY

Black, chrome & polished brass ironmongery upgrade available on many ranges. Standard shed rim locks we do not fit the escutcheon plates as standard. Timber is a natural product that is susceptible to shrinking and expanding which can cause the plate to distort & split the timber

### FLOOR BEARERS

Our floor bearers are 3 3/4" x 3" (95mm x 76mm) pressure treated lengths of timber.

Our buildings are designed to sit directly onto exact size bases which allows air flow underneath.

Floor bearers raise a building off the ground to prevent the floor from getting damp and rotting. Bearers need to be laid on flat, level, compact ground (or on top of level paving slabs/concrete). Bearers should be used if the base is larger than the footprint of the building, or if there is restricted airflow around the building, (i.e., a fence or wall very close to the shed) to avoid rainwater building up and sitting against the floor of the building. Bearers run the opposite direction to the floor joists within the floor of your building making a crisscross section. Floor bearers will add 3" to the height of your building.

### BUILDINGS WITH NO FLOOR & LIP

Buildings without a floor, bases should be made 1" under in total (e.g., 10 x 8 = 9'11 1/2 X 7' 11 1/2)

---

### KEY INFORMATION TO NOTE

Customers do not need to be in attendance on the day of delivery or installation, however if you will not be present, we will need to be advised in advance and have clear access available.

Our team will need suitable parking within 25m of your entrance, which must be available on your booking date. If there are any vehicle access issues that you are aware of, or difficulties in finding your property, please notify us in advance of your booking date.

Please allow clear uncluttered access so we can carry your buildings panels safely. Our team cannot work at heights over 10m, lift panels over 4ft high or work in unsafe conditions. Please inform us if there are any height, width, or sharp turn restrictions, and provide us with the height and width measurements of the restrictions. Failure to do this may result in us not being able to deliver the building or failure to install it.

We are happy to accommodate difficult accesses, however we do need to know in advance, so we are able to make buildings accordingly, and schedule the correct number of staff for the booking day.

We require the distance from the unloading area to the base to be 100m or less. If the carry distance is considerably more, please advise us prior to your booking date to discuss.

We require a minimum of 12" clearance around the base. If this is not possible, please advise us when placing your order, and be careful to make allowances for any roof overhangs.

As it is our policy to continually improve our products, we reserve the right to change specifications from time to time, however we will not change any significant variations without the customers agreement.

Parking permits or pay by hour parking is the responsibility of the Customer and must be provided and paid for by the customer for the duration of the building being installed.

# IMPORTANT TREATMENT, TANALISED TIMBER INFORMATION, RECOMMENDATIONS & GUARENTEES

## TANALISED TIMBER INFORMATION & TERMS OF GUARENTEE

All buildings will require ongoing maintenance following installation. Redwood & redwood tanalised timber will require a solvent protective treatment following installation prior to the colder months if this has not been applied by us. We offer a solvent treatment option to our buildings so we can do this part for you. The solvent treatment we use is Barretine protective treatment, this protects against wood rot, fungal disease and contains UV protection.

If your building is installed without a solvent treatment applied by us in the factory, we advise treating your building as soon as possible when the weather is dryer/warmer and maintaining it on an annual basis if not tanalised, or at least every 6 - 8 years if tanalised. If your building is installed in the wetter colder months we advise treating the building with a solvent treatment or similar product that will protect the timber as soon as possible. We cannot give an exact period when your building will need re treating as this is dependent on if your building is situated in a more exposed area (i.e., more damp conditions, subject to more sunlight or both).

We recommend treating your building with a solvent based treatment to protect against wood rot & fungal disease that also contains UV protection.

Timber is a natural product, as such it does contain moisture. The tanalising process increases the moisture content in timber, which may initially cause condensation within the building once it is installed.

Once your building has been installed it will require ventilating to allow the excess moisture to dissipate by leaving the doors and windows open as much as possible in the warmer dryer days for around 2 weeks, it may require longer in the wetter colder months.

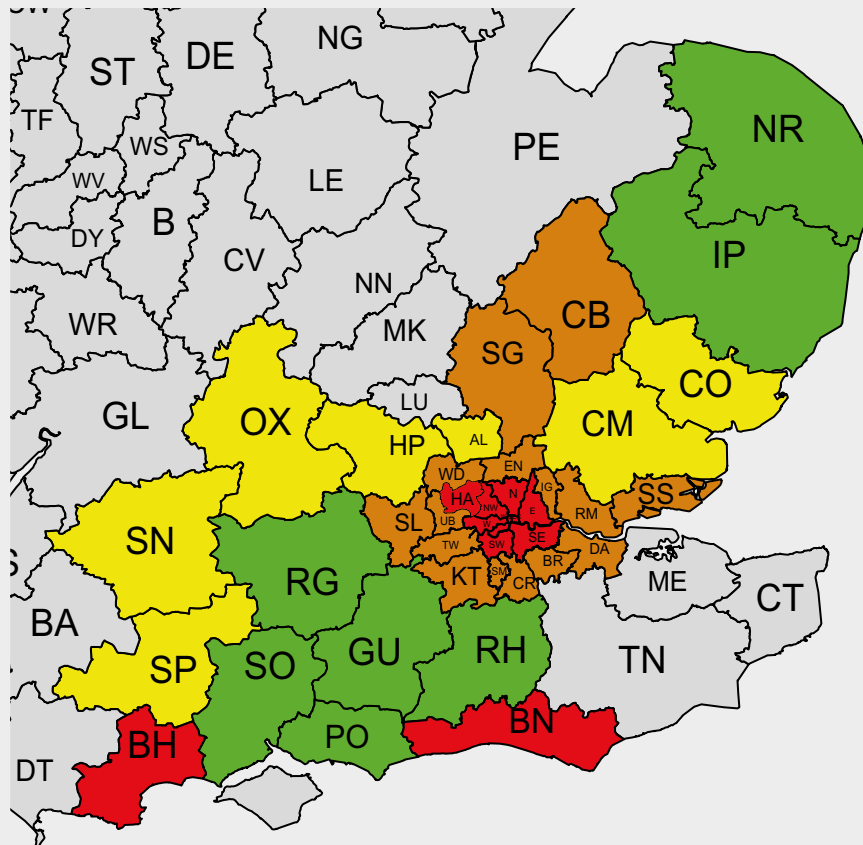

We do offer the fitting of air vents as an optional extra which may be something you would like to add if your building does not have opening windows or will be installed in a wetter/colder climate to help ventilation, they are also useful to allow air flow if you will not be using your building for long periods of time.

## Guarantees

All our buildings come with a 10-year guarantee against wood rot & fungal disease & 12 months guarantee against faulty parts & workmanship. Guarantees are subject to the buildings being installed and treated in line with our terms & recommendations.

## DELIVERY AREAS THE SOUTH & EAST

DELIVERY TO MOST AREAS WITHIN 50 MILES OF FARNHAM, SURREY & EAST HARLING, NORFOLK ARE INCLUDED IN THE PRICE  
SOME AREAS OVER 50 MILES FROM FARNHAM, SURREY & EAST HARLING, NORFOLK MAY INCUR A DELIVERY FEE
